

# Symmetry and Structural Properties of Condensed Matter 2014

## List of contributed posters

- P01** R. Agundez, J. Salfi, S. Rogge, M. Blaauboer, *Local Kondo temperatures in atomic chains*
- P02** K. Bocian, W. Rudziński, *Photon-assisted thermoelectric effects in ferromagnet-quantum dot-ferromagnet system with additional superconducting lead*
- P03** E. Castro *Interaction effects in low-buckled graphene-like crystals*
- P04** L. Chotorlishvili, R. Khomeriki, A. Sukhov, S. Ruffo, J. Berakdar, *Dynamics of Localized Modes in a Composite Multiferroic Chain*
- P05** H. Czyż, A. Włoch, T. Jasiński, *Ultrasonic methods of the cells separation in human blood*
- P06** K. Denisov, N.S. Averkiev, *Bound Magnetic Polaron in 2D System with the Strong Spin-Orbit Interaction*
- P07** A. Dyrdał, J. Barnaś, V. K. Dugaev, *Current induced spin polarization in magnetized graphene with Rashba spin-orbit interaction*
- P08** A. Działo, A. Paja, *Size and Impurities Effects on Resistivity of Ultra-Thin Metallic Layer*
- P09** J. Fal, G. Żyła, M. Cholewa, *Electrical properties of aluminium oxide-ethylene glycol (Al<sub>2</sub>O<sub>3</sub>-EG) nanofluids*
- P10** L. Gálisová, *Thermodynamics of the exactly solvable spin-electron tetrahedral chain*
- P11** R. Glavey, *Simulations of Guided Vortex Motion in Type II Superconductors with Asymmetric Corrugated Channels and Oscillating Vortex Radii*
- P12** M. Inglot, V. Dugaev, E. Ya. Sherman, J. Barnaś, *Spin pumping and charge-spin current injection in graphene with Rashba spin-orbit interaction*
- P13** D. Jakubczyk, *Some exact results in the one-dimensional attractive Hubbard model*
- P14** P. Jakubczyk, Y. Kravets, *A partial classification of bipartite entanglement in multipartite systems*
- P15** P. Kościak, *Quantum entanglement of two dipolar particles within a Harmonic Trap*
- P16** K. Kolasiński, Bartłomiej Szafran, *Scanning gate microscopy simulations of the quantum Hall electron interferometer*
- P17** A. Kuroś, *Two-electron resonances in quasi-one dimensional quantum dots with Gaussian confinement*
- P18** M. Kurpas, M. Gmitra, J. Fabian, *Spin-orbit coupling in pure and hydrogenated carbon nanotubes in a transverse electric field*
- P19** J. Milewski, T. Lulek, M. Łabuz, *Crystallographic interpretation of Galois symmetries for magnetic pentagonal ring*
- P20** I. Tralle, G. Hałdaś, K. Majchrowski A. Kolek, *New approach to the design of tunable THz-detector*
- P21** J. Mamczur, A. Wasilewski, T. Więcek, *A method for measuring thermal conductivity of liquid by using a laser beam*
- P22** A. Marmodoro, P. Trevisanutto, L. Sandratskii, A. Ernst, *Self-energy electronic structure renormalization effects in first-principles calculations of solids*
- 23** B. M. S. Mera, P. Mateus, N. Paunkovic, R. Loura, V. R. Vieira, *Semi-Classical Phase Space dynamics for the Quantum Toffoli Gate*
- P24** A. Mreńca, K. Kolasiński, B. Szafran, *Imaging localization of resonant states in antidots defined within a finite graphene flake*

- P25** M. P. Nowak, B. Szafran, *Spin polarization without magnetic field in a spin-orbit-coupled quantum point contact*
- P26** E. N. Osika, A. Mreńca, B. Szafran, *Simulations of spin-valley transitions in single and double quantum dots defined in carbon nanotube*
- P27** B. Pekerten, Ö. Bozat, A. Teker, M. Wimmer, I. Adagideli, *Majorana Fermions in Disordered Multichannel Wires*
- P28** M. Z. Pelc, L. Chico, E. Suárez Morell, M. Pacheco and L. Brey, *Transport properties of twisted bilayer nanoribbon systems*
- P29** A. Poshakinskiy, S.A. Tarasenko, *Spin dynamics in asymmetric and macroscopically symmetric (110)-grown quantum wells*
- P30** K. Reijnders, M. Katsnelson, *Focussing of electrons in graphene by n-p and n-p-n junctions*
- P31** R. Ya. Shvets, I. I. Grygorchak, A. S. Kurepa, N. T. Pokladok, Yu. I. Sementsov, G. I. Dovbeshko, Ye. Sheregii, B. Seredyuk, *Supercapacity of soft-expanded graphite in Li-intercalational electric current generation*
- P32** B. Spisak, M. Wołoszyn, *An influence of dephasing processes on the '2k<sub>F</sub>' scattering mechanism of conduction electrons in the three-dimensional structurally disordered systems*
- P33** R. Stagraczyński, *Combinatorics of Lax objects in Bethe Ansatz*
- P34** S. Stagraczyński, C. Jasiukiewicz, V. K. Dugaev, J. Berakdar, *Strain designed magnetic properties in III-V semiconductors*
- P35** A. Sukhov, P.P. Horley, C.-L. Jia, L. Chotorlishvili, D. Sander, J. Berakdar, *Theoretical study of ferromagnetic resonance in thin composite multiferroic structures*
- P36** T. Szczepański, V. K. Dugaev, *Resonant tunneling in a semiconductor structure*
- P37** M. Titova, A. V. Vedyayev, N. V. Ryzhanova, M. Ye. Zhuravlev, N. V. Strelkov, E. Y. Tsymbal, B. Dieny, *Spin-transport dependence on spin-orbit interaction in MTJs*
- P38** S. Topolewicz, *Interference of mobits in Quantum Cognition Models*
- P39** N. Tovstyuk, *Density of electron states and relaxation time of intercalated layer crystals*
- P40** I. Tralle, P. Zięba, W. Paško, *Three-component gyrotropic metamaterial*
- P41** M. Trybus, B. Woś, T. Ciuk, M. Ingot, *Measuring System for Observation of Electric Parameters of Graphene in Presence of Temperature Gradient*
- P42** A. Wal, *Magnetic band Brillouin zone of an electron in a periodic potential and quantized magnetic field*
- P43** K. P. Wójcik, I. Weymann, *Electric and thermoelectric properties of T-shaped double quantum dots coupled to ferromagnetic leads*
- P44** A. Wasilewski, T. Więcek, *An investigation of the dynamic Young's modulus for twisted fibers*
- P45** S. Wolski, V. K. Dugaev, J. Barnaś, T. Slobodskyy, W. Hansen, *Spin and charge transport through the Fe/MgO/GaAs heterostructure*
- P46** D. Żebrowski, B. Szafran, *Density functional theory simulation of an electrostatic defined graphene quantum dot*
- P47** G. Żyła, M. Cholewa, *Changes of nanoparticles agglomerates sizes during rotation measurement of rheological properties of MgAl<sub>2</sub>O<sub>4</sub>-diethylene glycol nanofluids*
- P48** G. Hałdaś & A. Kolek, *Influence of doping on threshold performance of mid-IR QCL – a NEGF based picture*
- P49** I. Tralle and P. Zięba, *Undulator-like radiation and cooperative phenomena in semiconductor microstructures with grating*
